[released](#)

Just this blurb:

USGS RELEASES REPORTS, DATA ON PAVILLION SAMPLING: The U.S. Geological Survey has released two reports on groundwater-quality sampling and other data from two monitoring wells near Pavillion, Wyo., where concerns have arisen about pollution possibly related to fracking. "While USGS did not interpret the data as part of this sampling effort, the raw data results are adding to the body of knowledge to support informed decisions," David Mott, director of the USGS Wyoming Water Science Center, said in a statement.
